

Bulk Merchandising Solutions

Bulk Liquid Tanks and Spigots

Select a Dispenser:

Find the dispenser that's right for your needs. **First**, select the capacity you need based on the turnover rate, not the shipper size, to keep quality high.

Second, select the spigot based on the type of liquid. **All models come with the container, lid, spigot, & label holder.** Spigots are all self-closing. All tanks and spigot assemblies disassemble for thorough cleaning.

1.) Tanks and Capacities:

1.1 Gallon

8" Tall
6.5" Wide
6.5" Deep

2.0 Gallon

9" Tall
9" Wide
9" Deep

4.3 Gallon

13" Tall
9" Wide
14.5" Deep

5.3 Gallon

14" Tall
9" Wide
14.5" Deep

2.) Spigot Types and Descriptions:

NL5090 Thin Food

NL5640 Oils Soy Sauces	NL5641 Maple Syrup Light Molasses Light Honey <i>(Not suitable for Non-Food)</i>	NL5643 Detergents Shampoos Cleaners Thin Soaps	NL5642 Honey Thick Food

The Inside Scoop

Cleanliness sells bulk.

We make it easy!

If flow through spigots slows down, or constant dripping occurs, the most common cause is residue build-up, not a faulty seal.

A thorough cleaning solves the problem.

Spigot Part #: 1514

Tomlinson Medium
Liquid Spigot used for
Trade Fixtures HDPE
Liquid Tanks

**All Dispensers
come with tank,
lid, & spigot.**

The Inside Scoop:

- Regular cleaning keeps dispensers and displays attractive, functional, and sanitary.
- Everything comes apart and is easy to clean to meet Health Dept. regulations.
- The normal cleaning method is washing with hot soap and water, rinse, then sanitize in a 3 compartment sink.
- To avoid lost sales, keep spare dispensers, spigots, and seals ready while a dispenser is being cleaned.

The Inside Scoop:

For Health and Safety:

- Sell products in Bulk which contain only mild ingredients. Read the label. When in doubt, sell it prepackaged. Locate products out of reach of children, and where displays can be monitored.
- Never use a dispenser for a food product that was previously used for non-food. Separate Bulk food and non-food displays to avoid cross-contamination.

Caution!

- No flammable products, concentrated citrus oils, or products with petroleum distillates may be used in our dispensers.

The Inside Scoop

Will it flow?

Here's a simple test to tell whether your liquid will flow through a spigot. Put a large dab of the liquid in the palm and turn it upside down. **If the liquid dribbles off of your hand readily, it will flow through the spigot.**
