Your Merchandising Partner

Trade Fixtures was founded in the early 1980's and revolutionized bulk food merchandising by solving familiar retail challenges: space utilization, stock rotation, ease of use, and merchandising appeal. Almost 40 years later, we're still the premier manufacturer and industry leader in bulk merchandising solutions, providing unmatched quality, timely innovation, and knowledgeable customer service.

With over a million bins in the marketplace, and thousands of satisfied customers, you can take comfort in knowing we're the company retailers trust as their merchandising partner.

Whether you need one bin or a 20,000 square foot bulk superstore, we stand ready to assist you in realizing your bulk merchandising goals. Please visit us at www.tradefixtures.com for more information.

WE ARE BULK DISPENSING!

BINS, FIXTURES, CUSTOM MILLWORK,
AND BULK ACCESSORIES.

(There are many benefits, here are just a few...)

Bulk Food Merchandising

Helps retailers exceed their merchandising goals

Maximize sales, profitability and density per square foot

- Bulk dispensed foods cost less than packaged foods & outsells them 2 : 1
 - Advertising & promotion are not required, you see the product
 - Perceived freshness, value and variety lead to purchases
- 35-45% average profit margins reported by retailers using our systems
- Offer greater shelf density and facings with bulk, than packaged goods

Allows retailers to engage green & value seeking customers

- Requires less resources (from the field to the table to the landfill)
- Customers seek opportunities to maximize their purchasing power

Quick return on investment (typically less than 6 months)

Enhances the customer's shopping experience

Consumers save limited resources & get what they want

- Money (they pay for the product, not the packaging)
- Food Waste (they can buy as little, or as much as they need)
- Package & Resource Waste (used in traditional merchandising methods)

Bulk foods are fun and encourage impulse purchases

- Bulk departments create a destination location within your store
- Builds customer loyalty and an eagerness to shop
- Bulk merchandising complements your store's decor, look and feel
- Visually appealing displays entice customer senses & imagination

Reduces environmental impact

Why Do Bulk?

The Benefits of Bulk Merchandising

Buy Bulk, the Ultimate Green Packaging!TM

Ten years after the Great Recession shook the confidence of consumers worldwide, signs that the global economies continue to grow steadily and improve daily can be seen in housing prices, record highs on the stock markets and a return to spending. While the memory of that time period lingers, a notable shift in the purchasing habits of consumers can be seen as they have emerged smarter and wiser demonstrating a renewed focus on how and where they spend their money. Whether by force, or choice, they are seeking items with a value proposition, and are more conscience of getting their monies' worth.

Regardless of the economy, offering bulk foods which are delivered to stores in 25 or 50 lb sacks and dispensed through our award-winning bins allow customers and retailers to purchase the amount they want, eliminate unnecessary packaging, minimize food waste, and reduce resources used in the manufacture, transport and disposal of traditionally packaged products. Think of all the oil, trees, water, land and money being saved!

Retailers, Customers, and the Environment all benefit. It's why we say Buy Bulk, the Ultimate Green Packaging!TM

Eco-Friendly Features and Benefits of our products:

- Made of durable, high impact plastic which lasts for 10+ years and is recyclable
- We use locally sourced materials when possible
- First In, First Out stock rotation design moves product
- Unlike open containers, our bins seal freshness in and keeps air out
- Bins are shipped 4 to 6 in a box, instead of individually wrapped units
- Portion and Flow Control features reduce food waste
- Fixtures can be made with environmentally friendly materials, or use existing shelving

Environmental Stewardship

The Green Story

Getting Started...

Designing a bulk department can be a fun, and rewarding experience.

The relationship our salesperson builds with you will go beyond the sale of the bin and fixture. It's a partnership and one in which we look forward to your success. In fact, your success *is* our success.

There is a reason you deal with a company for over 15 years. Throughout this time Trade Fixtures has helped in designing our needs whether it be for one rack or a 600 sq. ft. tradeshow display.

The design personnel have developed and improved upon our ideas and were always available to work directly with our customers. The development and the workmanship of the production department is unsurpassed.

More important, the recipient of their products, our customers, have always been satisfied, and continue to rely on us to set their expansions with Trade Fixtures products.

-First Colony Coffee and Tea

We want to give you a sense of possible options and customization with these bulk sets and layouts. You will be able to more efficiently design the store you want. For that reason, we have placed photos and diagrams for visual assistance throughout this brochure. Let's begin.

Be Committed.

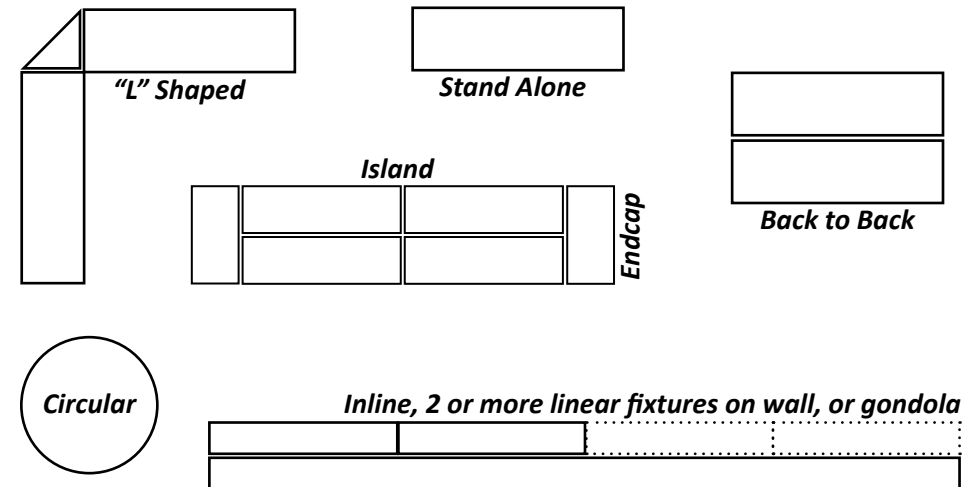

Freshness, cleanliness, value, and variety draw customers to the bulk department, and from there they spend money, and lots of it. Retailers who have made the investment have been happy with their merchandising decision to offer bulk foods.

Determining Your Space

Plan on allocating 8 feet (2.4 meters) minimally, for approx. 50 products to 16 feet (5.0 meters) ideally, or 100 products to get started

Our fixtures are sold in varying heights, widths, depths and configurations to accommodate any space and merchandising need.

Here are a few of our most popular layout options: Stand Alone, Inline, "L" Shaped, Island, and Back to Back. Fixtures can also be made to stand on their own, or to sit on countertops. You can do one or all of these.

Selecting Your Bins

The products you want to sell will vary by location, and some products will sell better than others given customer preferences and availability. We encourage you to visit with one of the many natural foods / candy / coffee and tea suppliers, who can help you with your bulk product selection. This quick reference guide to help you decide what type of bin you should select based on general product type. These are guidelines, not absolutes, based on our experience.

Bulk Departments

How to Create Your Profit Center

Gravity Bins:

- Dried Beans
- Rice
- Nuts / Seeds
- Coffee Beans / Tea
- Hard Coated Candies
- “Easy to Flow” items

Scoop Bins:

- Grains & Flours
- Dried Fruits
- Cereals
- Granolas
- Sticky Candies
- “Hard to Flow” items

High Volume Bins:

- Basmati Rice
- Whole Wheat
- Flours
- Rolled Oats
- High Volume / Low Margin foods

Inversion® Bin:

- Spices
- Herbs / Fine Cut Teas
- Powders
- Mixes
- Low Volume / High Margin foods

Selecting Your Fixtures

Fixture selection is a personal choice. Factors such as aesthetics, budget, value, return on investment, architectural and space limitations all play a role in which fixture many of our customers select. With the many options we have available, there are a number of ways to configure the fixtures to maximize your retail merchandising experience.

We have over 50,000 Computer-Aided Drawings of fixture designs, which should tell you that no two projects are alike. However, there are many features which every project will share such as bin style selected, fixture configuration, material used, accessories added, color, height, and width. There are no right or wrong answers and this is where your salesperson becomes an invaluable resource.

What's your preference? An all natural, wood look and feel, or steel trimmed with laminates? Twin tier or all scoop configuration? Graphics and lighting? Elegant or simplistic? If you can dream it, we can build it.

Available Options

Finishing out the perfect bulk destination is important. Trade Fixtures offers many options which help you and your customers enjoy an effortless, rewarding bulk shopping experience.

Optional Bin Accessories:

- Colored handles and lids
- Portion Control, 2 or 4 oz. dispense per pull

Optional Fixture Accessories:

- Different base box configurations

- Catch trays to minimize cleanup
- Ergonomically designed labor savers for bin refilling without lifting (see below)

Swing Down Arm

Slide Out Arm

Optional Department Accessories:

- Bottles, ties, jars, scoops, tongs, and more

TRADE FIXTURES GRAVITY BINS

are today's standard for merchandising any free flowing product such as grains, beans, rice, seeds, nuts, coffee, mixes, hard shelled candies, small pastas, granolas, cereals, rolled oats and much more!

We are one company offering two brands, the Trade Fixtures (left photo) and the New Leaf Designs (right photo). In essence, the bins secure to a shelf, and when the handle is pulled, gravity allows the product to flow into a bag, or deli cup for purchase.

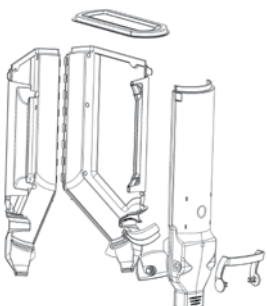

NL6012B-TR

FEATURES AND BENEFITS (BOTH)

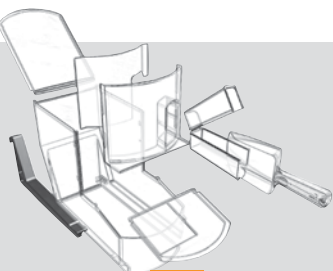

- (First In, First Out) stock rotation ensures freshness
- Tamper resistant design and tight lid seal
- Virtually unbreakable Tritan™ construction
- Easy to clean and dishwasher safe up to 130°F.

U2 Steel Fixture

The Trade Fixtures U2 Steel fixture is a freestanding bulk destination for customers. Retailers will love the flexibility and merchandising options available to help create a functional, successful bulk department anywhere!

Benefits and features include:

- Holds Gravity and/or Scoop bins
- Available in 2', 3' or 4' std. widths
- Ships assembled for quick, and easy installation.

Gondola Fixture

The Trade Fixtures Gondola fixture option allows you to create a bulk display on your existing gondola sets. Simply remove the gondola shelves and install our exclusive bracket system.

Benefits and features include:

- Our most economical option offered
- All of our bins can be easily mounted onto most standard gondola shelving
- Transform a boring, dull gondola into an exciting, beautiful bulk section

Display Fixtures

Steel, Gondola, or Custom Millwork

Custom Millwork

Trade Fixtures simplifies the often complicated task of sourcing bins, fixtures, and department accessories. We offer a one-stop shopping experience for those looking to add a bulk solution or expand an existing department.

Using a design-build model, we efficiently and accurately manufacture single custom units or a package of coordinated fixtures for you.

Benefits and features include:

- You get what you want (style, color, materials)
- You get our 30+ years of design experience

Graphic Packages

Whether you are trying to teach someone how to use your bulk department, communicate specials, in-store and social messages, or simply brand your store's identity, let Trade Fixtures design and deliver a graphics package tailored to you.

Benefits and features include:

- Affordable / Competitively priced
- Colorful Product / Green Messaging
- Easy to Install / Relocate with ease
- Standard / Custom artwork

As proud members of the United States Green Building Council and PureBond® Fabricator Network, Trade Fixtures uses locally sourced steel, recyclable plastics, steel, and environmentally friendly materials and processes.

- Each expansion section features GST (Gasket Seal Technology) = Airtight for Freshness
- Available as a Standard Gravity Feed or with Agitation feature (for sticky/dense products)
- Can be used on existing fixtures
- Multiple UPC / label holders
- New look blends the best of the Trade Fixtures, and Newleaf Designs gravity bins

Fustis for Liquids

Our Fustis are made in Italy and are NSF Certified, ANSI Certified, and SCC (Standards Council of Canada) Certified. Manufactured to the highest quality standards.

The seamless construction prevents the deposit and accumulation of organic matter and the possibility of bacterial growth. Inferior "folded" metal containers, although less expensive, are constructed like tin cans and have seams, which can trap food particles, leading to bacterial contamination. Perfect airtight storage of olive oils, vinegars, water or wine, they minimize exposure to air and light, and keep contents fresher longer.

Bulk Liquid Tanks and Spigots

Trade Fixtures also sells dispensing tanks for merchandising liquids. Bulk liquids are sold using dispensing tanks and purchased by the consumer in reusable plastic or glass jars.

Customers enjoy the variety, freshness, and quality of bulk liquids without the unnecessary packaging, waste and additional costs found with conventionally packaged products.

If you're not currently selling bulk liquids, we encourage you to add a section of oils, tamari, extracts, honey, syrup, molasses, soaps, shampoos, cleaners, and other bulk liquids to give your store a "complete" range of bulk products.

Here are some helpful tips to help you get started...

- **Offer a variety of oils, honey, syrup, extract, molasses, etc.**
 - Local products and name brand varieties
 - Carry the products your customers want to buy
 - Build loyalty and customers keep coming back
- **Promote freshness, quality, and benefits to customers**
 - Bulk products perceived as fresher. Turnover is key
 - Unadulterated liquids offer additional health benefits
 - Cleanliness sells bulk
- **Also, consider offering non-food bulk liquids**
 - Detergents, Soap, Shampoos, Cleaners, etc.
 - Keep food use, and non-food use displays separate
- **Use the chart (right) to appropriately buy your dispensers**
 - Consider available space, capacity and flow rate
 - These are recommendations, not absolutes, based on our experience in the industry. Not all products will flow with each spigot.
 - Conducting a simple test before you order will tell whether your liquid will flow through a spigot or not. Put a large dab of the liquid in the palm of your hand, and turn it upside down. If the liquid dribbles off of your hand readily, it will flow through a spigot.

LET'S SELECT A DISPENSER:

Find the dispenser that's right for your needs. **First**, select the spigot based on the type of liquid. All spigots are self-closing, and all spigot and tank assemblies disassemble for thorough cleaning. **Second**, select the tank capacity you need based on product turnover rate, not the shipper size, to keep quality high.

1.) SELECT SPIGOT BY PRODUCT TYPE

Thin Food NL5090 (spigot only)	Thick Food NL5190 (spigot only)	Non-Food NL5390 (spigot only)	Ex.Thick Food NL5690-01 (spigot only)
Fast Flow for a wide range of thin liquids. Self closing.	Real no-drip seal. Precision Flow for thicker liquids. Self closing.	High Flow, positive shutoff. Self closing.	Spigot has the cleanest shut off with its pressure seal.
			
3/4" dia. hole	1.25" dia. hole	7/8" dia. hole	1.875" dia. hole

2.) SELECT TANK BY CAPACITY BASED ON PRODUCT TURNOVER RATE

	1.1 Gallon			
	1.1 Gallon 8.0" Tall 6.5" Wide 6.5" Deep	NL5001 (Tank & Spigot) Oils Extracts Soy Sauces Vinegars	NL5101 (Tank & Spigot) Maple Syrup Light Molasses <i>(Not suitable for non-food)</i>	Not Available
