GRAVITY DISPENSERS

Convenient and easy-to-use gravity dispensers from Trade Fixtures are an attractive way to merchandise bulk grains, beans, rice, seeds, nuts, cereals, candies, and more. Adding gravity dispensers to your store can increase shopper loyalty and lead to larger basket sizes all while offering sustainable foods.

Gravity dispensers are a **durable, cost-effective** way to add or improve bulk food merchandising at your grocery store or co-op.

User-friendly gravity dispensers provide a seamless view of products through the crystal clear, BPA-free plastic shell, which is both scratch and haze resistant. No scoops, no touching or cross-contamination of bulk products – simply align the receiving container or bag and pull the handle to dispense just the right amount. Choose from standard free-flow bins, portion control options to reduce food waste and spillage, or Gravity Plus™ dispensers with agitation option to efficiently dispense sticky foods like candies or granular products like flour and sugar. Plus, our products are the only gravity dispensers that can safely be cleaned in a high temperature dishwasher.

Durable Tritan™ plastic body is scratch and drop resistant and includes a glare-free label holder for product details, branding, and pricing information.

Clear view of bulk products improves shopping experience and enhances overall customer satisfaction.

Easy to clean dispensers can be fully disassembled for dishwasher-safe cleaning.

Sustainable & profitable bulk dispensers allow shoppers to only purchase what they need while reducing single use plastic packaging.

Fast & simple to install to new or existing shelving.

OPTIMIZE PRODUCT MIX WITH DISPENSER FLOW OPTIONS:

Free flow

Standard dispenser allows products to flow freely when the handle is pulled down, automatically stopping once handle is released.

Agitation floor with baffle

Gravity Plus™ dispensers are equipped with an agitator to move hard-to-dispense products that may clump or become lodged in free flow dispensers.

Portion Control

Restricts the amount of product dispensed with a single handle pull to reduce food waste, spillage & shrink for high value products.

GRAVITY DISPENSER FEATURES

- Made with high-impact, BPA-free Tritan™ plastic
- Optional portion control accessory
- Dishwasher safe up to 190° F (88° C)
- Available in a variety of sizes and flow options
- Glare-free label holder
- Made in the USA
